CARE & MAINTENANCE

Stainless steel surfaces may show fingerprints and should be cleaned regularly. Use a soft, dry or slightly damp cloth. Do not use household cleaners containing chemicals, acids, bleach, or abrasive agents, as these may damage the surfaces.

For fabric upholstery, vacuum regularly with a soft brush attachment. Blot spills immediately with a clean, absorbent cloth—do not rub. For stubborn stains, use professional upholstery cleaning. Protect from prolonged direct sunlight to preserve the fabric's color and texture.
