CARE & MAINTENANCE

Solid wood may become weathered or the fibres may rise slightly. Wipe clean daily using a well wrung cloth and clean water. Avoid using cleaners containing any type of chemicals. Wood should not be exposed to excessive heat, direct sunlight or humidity. Please note that due to its natural origin, wood varies from furniture to furniture in its veins and tonality. Over time, it will suffer natural aging.

For fabric upholstery, vacuum regularly with a soft brush attachment. Blot spills immediately with a clean, absorbent cloth—do not rub. For stubborn stains, use professional upholstery cleaning. Protect from prolonged direct sunlight to preserve the fabric's color and texture.
